

Fixed displacement axial piston pumps compact-series 311.K

Pnevmostroimashina JSC (brand name PSM-Hydraulics®) launched the production of fixed displacement axial piston bent-axis compact-series pumps 311.K, working displacement 12, 17, 25, 28, 34, 80 cc.

Design:

- keyed shaft: 8x32x35 DIN/ISO 14; - pressure line: G1/2" DIN/ISO 228;
- suction line: G3/4" DIN/ISO 228;
- clockwise and counterclockwise rotation

Feed coefficient			0.	95								
Overall efficiency coefficient			0.	91								
Weight (without working fluid), kg	7.5	7.5	9	9	9	18						

Installation:

The pumps are mounted directly on power take-off (PTO) or drive shaft of mobile machines.

Fixed displacement axial piston pumps compact-series 311.K

Overall dimensions

- S suction port G³/₄" as per DIN ISO 228, depth 16 A pressure port G¹/₂" as per DIN ISO 228, depth 14
- R air bleed ports (plugged) M10x1

- S suction port G11/4"x20
- P pressure port G1"x18
- R air bleed ports (plugged) M10x1

Application:

The pumps are intended for hydraulic circuits of mobile machines

Construction machines

Road-building machines

Municipal machines

Forestry machines

Special-purpose machines

Advantages:

- maximum pressure up to 35 MPa;
- compact size and light weight;
- easy installation;
- improved reliability

Options available upon agreement with the customer:

- complete set delivery "Pump + PTO";
- mounting flanges as per ISO, GOST, DIN;
- delivery of suction line hoses, pressure line fittings, spare parts & accessories;
- vertical and horizontal orientation of the pump

Fixed displacement axial piston pumps compact-series 311.K
